

# BNP PARIBAS MUTUAL FUND

## BNP Paribas Short Term Fund - Portfolio as on December 31, 2021

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

### <sup>^</sup>Concept of Macaulay duration:

The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration.

<sup>^^</sup>Riskometer basis portfolio of the Scheme as on November 30, 2021.

| Security Name                         | % of Net Assets | Rating     |

| Potential Risk Class (PRC) matrix*      |                                      |                                |                                      |
|-----------------------------------------|--------------------------------------|--------------------------------|--------------------------------------|
| Credit Risk (Max)→                      | Relatively Low: Class A<br>(CRV>=12) | Moderate: Class B<br>(CRV>=10) | Relatively High: Class C<br>(CRV<10) |
| Interest Rate Risk (Max)↓               |                                      |                                |                                      |
| Relatively Low: Class I<br>(MD<=1 year) |                                      |                                |                                      |
| Moderate: Class II<br>(MD<=3 year)      |                                      | <b>B-II</b>                    |                                      |
| Relatively High: Class III<br>(Any MD)  |                                      |                                |                                      |

MD=Macaulay Duration, CRV=Credit Risk Value.

\*The above PRC matrix denotes the maximum risk that the Scheme can take i.e. maximum interest rate risk (measured by MD of the scheme) and maximum credit risk (measured by CRV of the scheme).

This is present portfolio mix and portfolio scrips may vary depending on the availability of the relevant papers from time to time and the credit view and interest rate scenario in the opinion of the Fund Manager of the Scheme. It may be noted that above investment is subject to Fund Manager's discretion as per prevailing market conditions, in line with Scheme objectives as mentioned in the Scheme Information Document (SID) and Key Information Memorandum (KIM).

**BNP Paribas Short Term Fund** (An open ended Short Term Debt Scheme investing in instruments such that Macaulay duration of portfolio is between 1 year and 3 years. **A moderate interest rate risk and moderate credit risk**): The primary objective of the Scheme is to provide income consistent with the prudent risk from a portfolio comprising various debt and money market instruments. However, there can be no assurance that the investment objective of the Scheme will be realized. The Scheme / Plan(s) do not guarantee / indicate any returns.

**Mutual Fund investments are subject to market risks, read all scheme related documents carefully.**
