LOW **VERY HIGH**

Investors understand that their principal will be at Low to Moderate risk.

^Concept of Macaulay duration:

The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration.

^{^^}Riskometer basis portfolio of the Scheme as on April 30, 2021.
